Dear Parents,

We are happy to meet you through the 3rd letter of the current academic year of our school.

1. EDITORIAL

This pandemic has taught us that change is the end result of all true learning. The change required today is to test the **intelligence and life skills** of our children rather than testing their memory and memorizing power. Learning how to learn is the most important **skill** in life.

Any skill that is useful in our life can be considered a life skill. We need to develop this in our kids to have the actual maturity. Those with strong life skills are less likely to be reactive and they are aware of their surroundings and themselves.

Being at home during the lockdown has taught all of us to be more cooperative and empathetic. The entire family is at home together and this will help the kids to learn basic skills like proper way of communication verbally or in writing, handling of criticism in a well manner which will help them to be self-aware and thoughtful. Resilience is a virtue to be developed. This togetherness can help to learn apologizing and asking for help. All these will result into making them more adaptive and analytical which will make them a true learner who can be a leader tomorrow.

So have a **positive attitude** towards the Present and teach the basic **life skills** in **every** household task.
Stay Safe, stay healthy and Stay Happy!
